Newsletter Invoicing the public sector

Dear subscriber!

Maintenance downtime

Saturday, 2015-11-28, 02:00 until Sunday, 2015-11-29, 20:00 Uhr

Due to maintenance possible network failure may occur. Hence the procedures E-RECHNUNG.GV.AT and TEST.E-RECHNUNG.GV.AT may temporarily be unavailable. Messages regarding submitted e-Invoices may be delayed and will be submitted at the latest after finalization of maintenance.

We apologise for any inconvenience.

Reminder - cessation of ebInterface V 3.0 and 3.02:

As of 2016-01-01 the versions 3.0 and 3.02 of ebInterface will no longer be accepted by E-RECHNUNG.GV.AT because these versions are outdated and do not adequately support the actual requirements of e-Invoices.

E-Invoices in the formats ebInterface 3.0 and 3.02 will still be accepted until 2015-12-31. The versions ebInterface 4.0 and 4.1 (which is supporting e-Invoicing the public sector best) as well as PEPPOL-UBL are not affected.

Please note that business software creating ebInterface 3.0 or 3.02 e-Invoices has to be updated to create ebInterface 4.1 until the end of 2015.

As a first step all information concerning ebInterface versions 3.0 and 3.02 were removed from the E-RECHNUNG.GV.AT site.

Best regards

E-RECHNUNG.GV.AT-Team
